1 Motivation

Traveling is important for humans. We are communal creatures that are all of the same species, yet our location determines societal actions based off cultured and governmental laws. We are so similar, yet our little worlds are so entirely different. Traveling to see places beyond our hometown is crucial to gain exposure to the world. Whether someone travels domestically or to a foreign country, it can be an experience that is reminisced for a lifetime. Traveling fosters a medium to build human connections with one another by learning about culture, food, new sites, music, and the way people live their day to day lives in different parts of the world. It's the best on-site learning a person can get. The internet can only explain so much about a place. Traveling is also important for human happiness and mental health. Studies show that traveling can be great for mental health. Living in a world where individuals are constantly slammed with the stress of work, relationships, and maintaining a family, it's important that they take time to relieve all that stress, so they can continue to function normally. Traveling helps humans gain a greater understanding of themselves to create a feeling of wholeness within their own individuality.

But Planning for trip or a tour is quite difficult. Because, a single unpleasant event can spoil the trip. Because there are health and safety issues, on-site transport and currency related issues, timing related issues, food and basic needs related problems, budget and booking related problems etc. So, to make a successful and enjoyable trip, a proper planning is really very important. An organized well planned trip can reduce the complexities. It will save both time and money.

2 Introduction

We are developing "Sunset Vacation", a platform to make travelling and hosting more easier. Here, we introduce our project with two modules,

- **Booking Module :** This module is for the users. Here an user can search according to his/her requirements and book. Besides, a person can have the transportation guideline and can book according to his/her requirements. This module has three sub-modules.
 - Hotel Booking.
 - Transport Guideline
- **Hosting Module :** This module is for hosts. Here an user can host his/her properties like a house, cabin, beach house etc. Besides, an user can host experience and become a tour guide.
 - Property Hosting.
 - Experience Hosting.

Our project "Sunset Vacation" helps people to make their trip more pleasant and assuring. They can plan trip within a very short time and can have a budget friendly safe trip. It makes easier for the users to choose a place and organize their schedule and make the trip efficient.

Again, this is a great platform for hosts. They can advertise their properties and experiences properly and efficiently. They don't need to have a large and fancy place with many services. They can host without a huge business plan or large amount of capital. Thus, it can be a great platform to earn money.

3 Requirement Analysis using BPMN diagram

Feedback:

- Here we didn't add end state for reservation cancellation in hotel/resort booking sub-module.
- In Management Dashboard, a travel lane was suggested to be added.
- Here, travel community sub module had some errors regarding gate. usage.

4.8 Gift Card

As there are many modules in our project which will be very difficult to complete and make imperfection to the important modules. So this gift card features are told not to implement in our project.

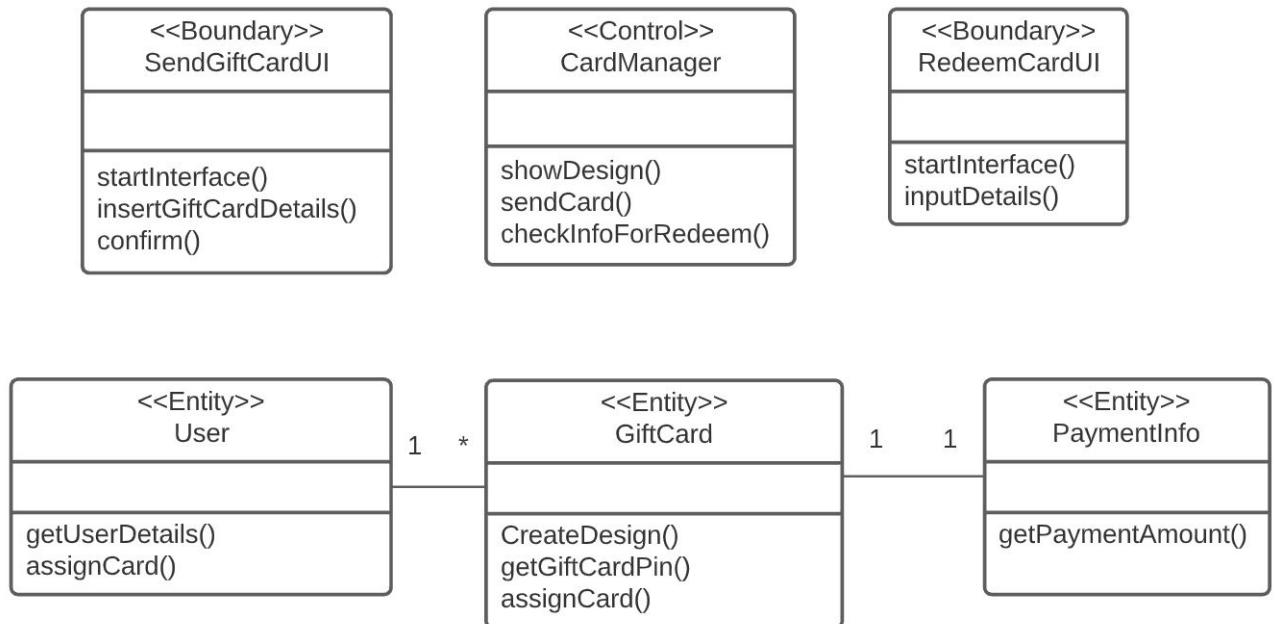

Figure 16: Gift Card

5 ER diagrams

5.1 User Module

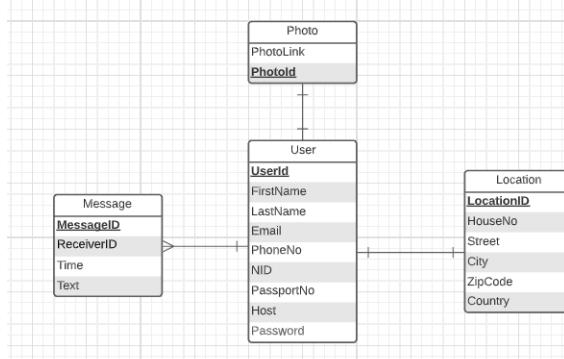

Figure 17: Entities related to user module

5.2 Hosting Module

Teachers suggested that we should use one to many relationship between Property-PropertyFacilities and Facilities-PropertyFacilities

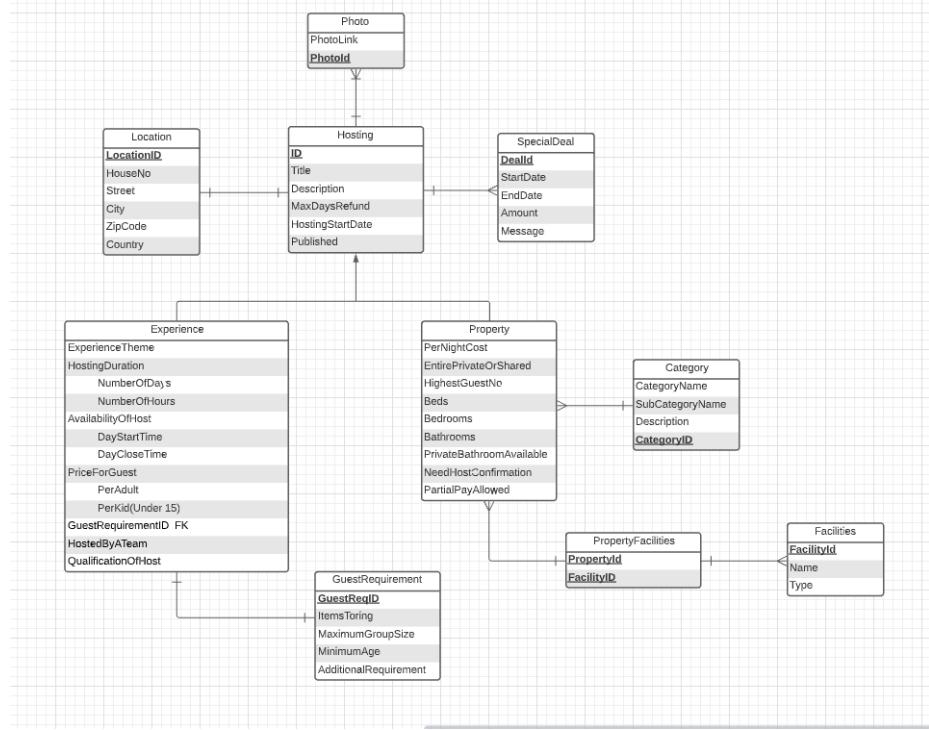

Figure 18: Entities related to hosting module

5.3 Booking Module

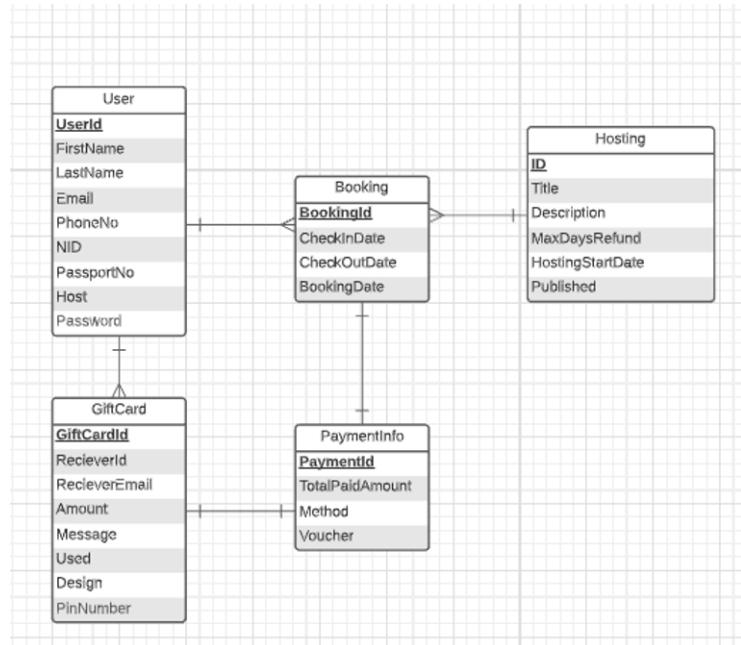

Figure 19: Entities related to booking module

5.4 Flight Module

Teachers suggested that we should use many to many relationship between Passenger-FlightBooking.

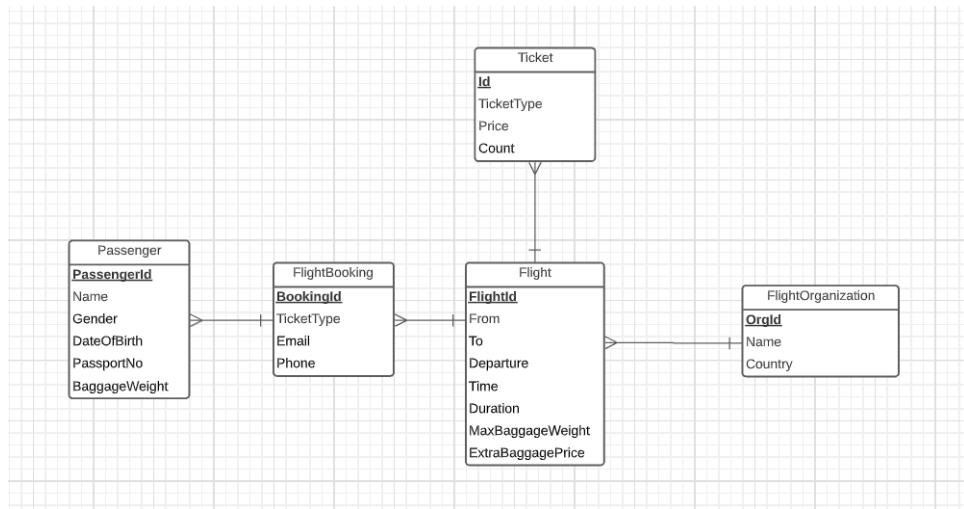

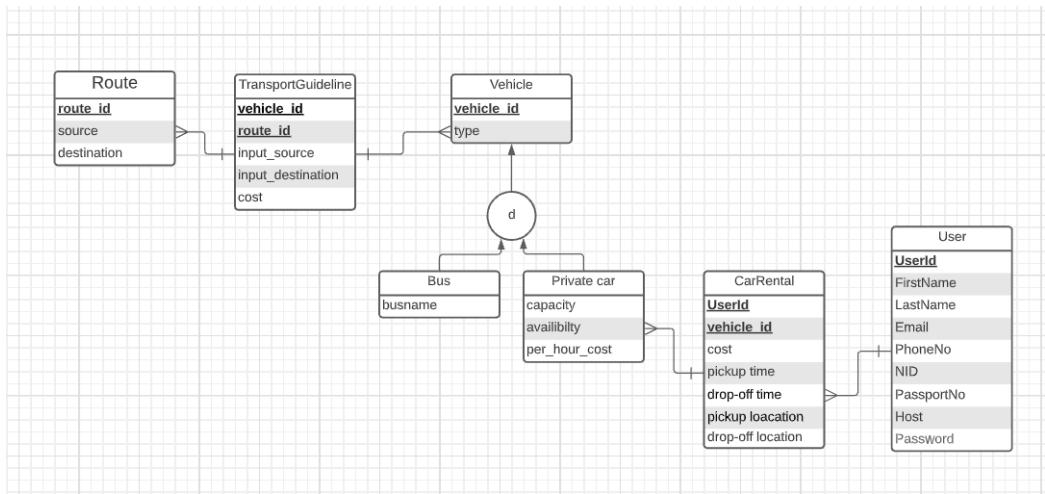

Figure 20: Entities related to flight module

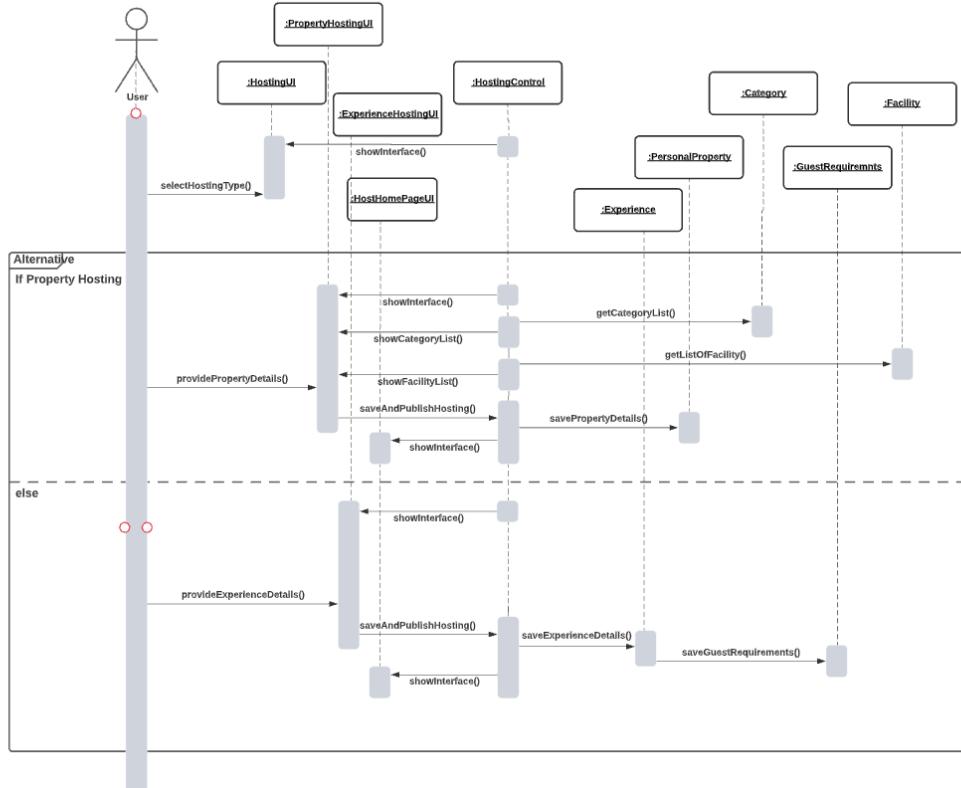

5.5 Transport Module

Teachers suggested that we should use one to many relationship between CarRental-User instead of many-to-one relationship.

6 Sequence diagrams

6.1 Hosting

6.2 Property Hosting

Here, instead of using `providePropertyDetails()` we are suggested to use several input functions so that the order of fetching category list and facility lists, and the responses of the user are understood properly.

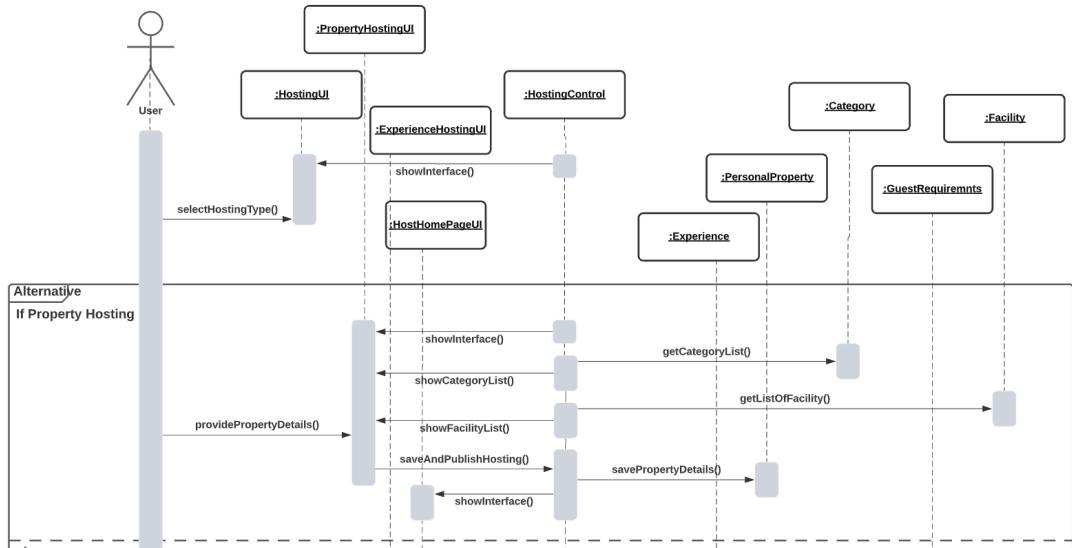

Figure 23: Property Hosting

6.3 Experience Hosting

We are suggested to choose the input entities separately instead of `providePropertyDetails()` method.

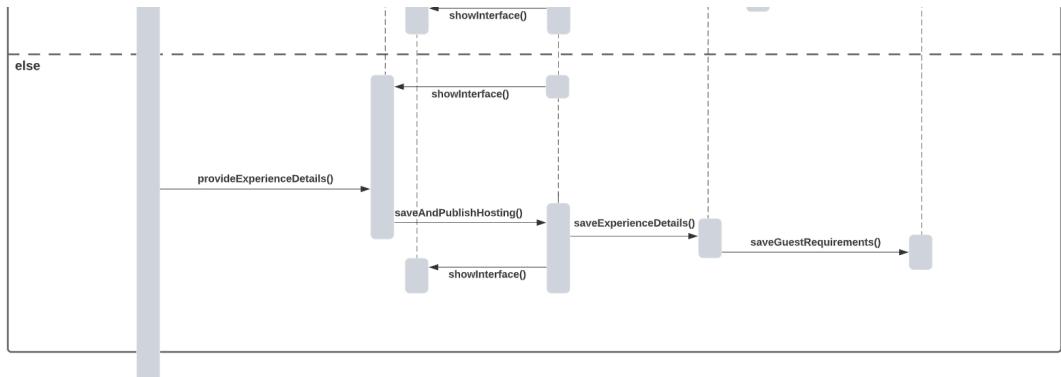

Figure 24: Experience Hosting

6.4 Search

Here, we are suggested to mention different filter options instead of only date.

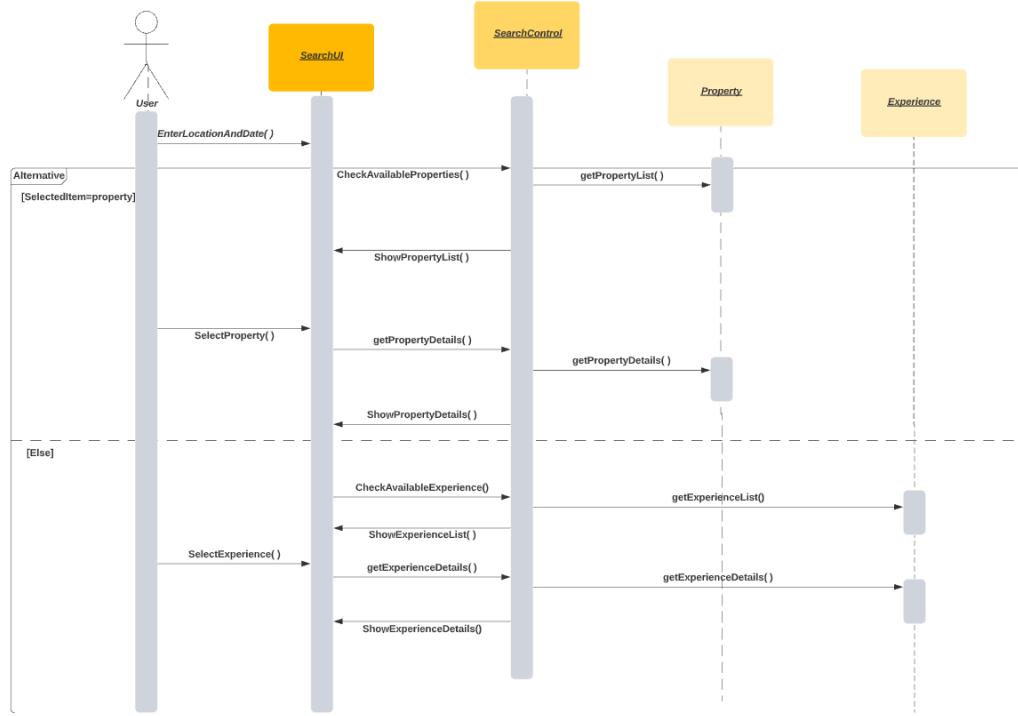

Figure 25: Search Property or Experience

6.5 Reservation

Since we didn't implement the `makePayment()` in details we were told to elaborate this. We had to add the detailed payment method.

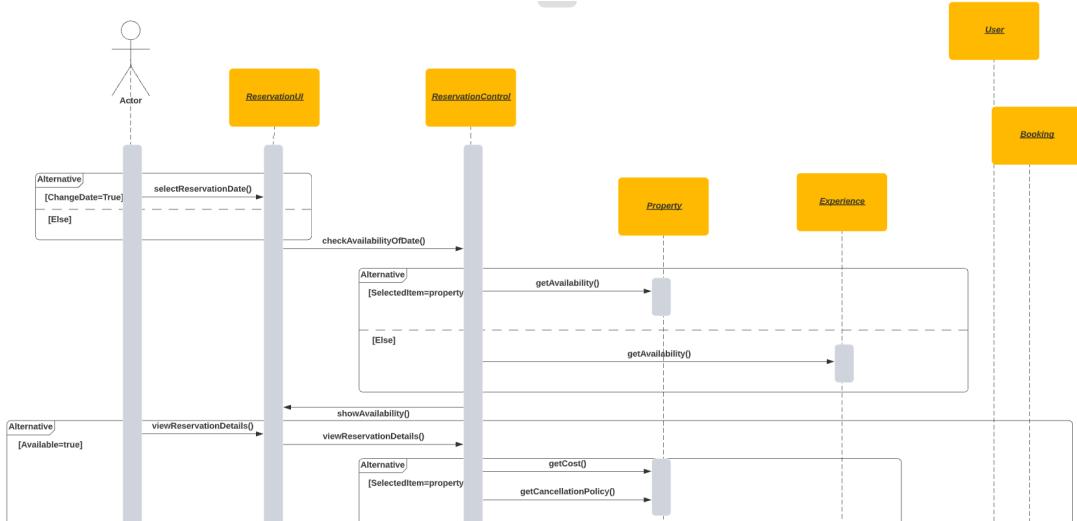

Figure 26: Reservation

8 State diagrams

We didn't implement any state diagram for our project.

9 Mock UI

9.1 Home page

9.2 Property searching

The image shows a wireframe or placeholder for a property search results page. At the top, there is a navigation bar with a logo, a 'Switch to hosting' button, and user profile icons. Below the navigation bar is a filter section with buttons for 'Tiny homes', 'Beachfront house', 'Cabins', 'Farms', 'Island house', 'More', 'Time', 'Guests', and 'Filter'. The main content area displays eight property cards arranged in two rows of four. Each card has a placeholder image and the following information: location, price per night, and distance from the user.

| Location | Price / Night | Distance |
|-----------------|---------------|----------------------|
| Hanoi, Hanoi | \$75/ Night | 1611 Kilometers away |
| Donghr Town | \$111/ Night | 3141 Kilometers away |
| Canacona, Goa | \$95/ Night | 1231 Kilometers away |
| Hazhou, Zeijing | \$60/ Night | 2930 Kilometers away |
| Ubud, Bali | \$218/ Night | 3200 Kilometers away |
| Luzhky, Ukrain | \$150/ Night | 4000 Kilometers away |
| Dai, Yunun | \$250/ Night | 3500 Kilometers away |
| Gangtok, Sikkim | \$80/ Night | 1250 Kilometers away |

Feedback

In this page , there is so many features so users have to scroll all the down to view those which is cumbersome. So we have to split it up into different pages so that it becomes convenient for the users to know the details.

10.5.7 Image upload

A screenshot of a mobile application interface titled "Upload your photos". At the top, it says "Add at least 5 photos" and has a "Upload Image" button. Below are four photo thumbnails: a house at sunset, a wooden cabin, a forest scene, and a mountain view. At the bottom are "Back" and "Next" buttons.

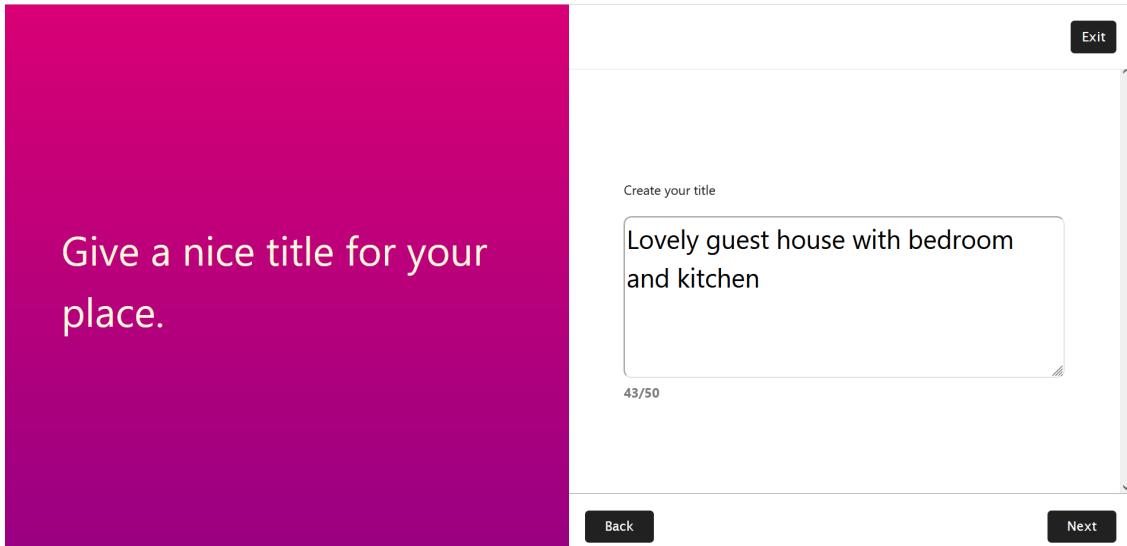

Let's add some photos of your place.

10.5.8 Description

A screenshot of a mobile application interface for writing a description. It says "Write a short description about your place. Mention dos and don'ts for your guests." Below is a text area containing "Good security", "Fully furnished", and "Well groomed garden". At the bottom are "Back" and "Next" buttons.

What else guests need to know about your place?

10.5.9 Title

Give a nice title for your place.

Create your title

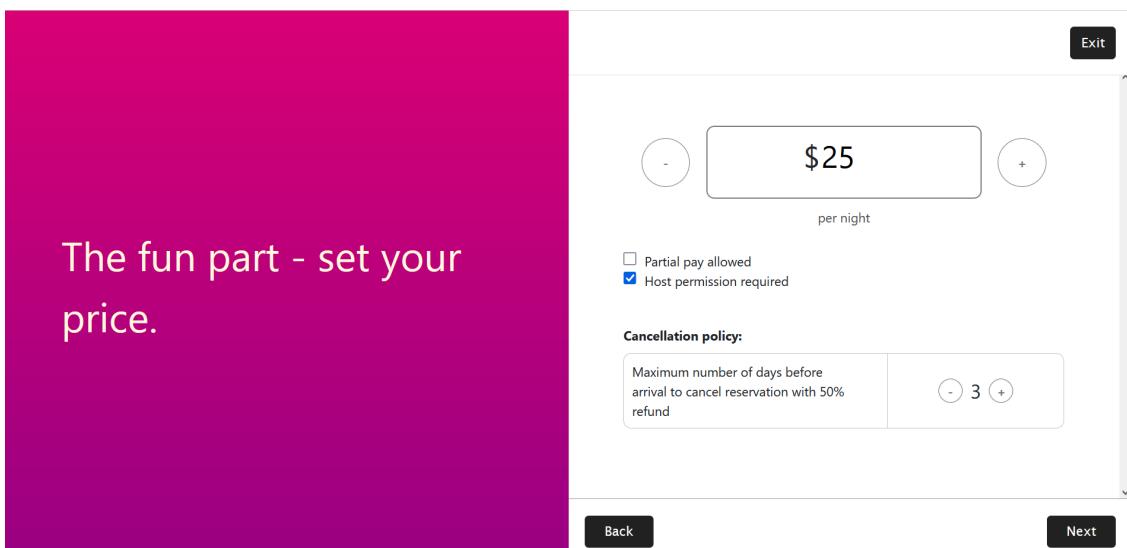

Lovely guest house with bedroom and kitchen

43/50

Back Next

The left side of the screen is covered by a large red rectangular overlay. On the right, there is a white input field with a thin black border. At the top right of the input field is a small black rectangular button labeled "Exit". Inside the input field, the placeholder text "Create your title" is visible in a small, gray font. Below the placeholder, the user's input "Lovely guest house with bedroom and kitchen" is displayed in a larger, black font. A small number "43/50" is located at the bottom right corner of the input field, indicating the character count. At the very bottom of the screen, there are two dark gray rectangular buttons labeled "Back" and "Next".

10.5.10 Pricing and other info

The fun part - set your price.

\$25 per night

Partial pay allowed
 Host permission required

Cancellation policy:

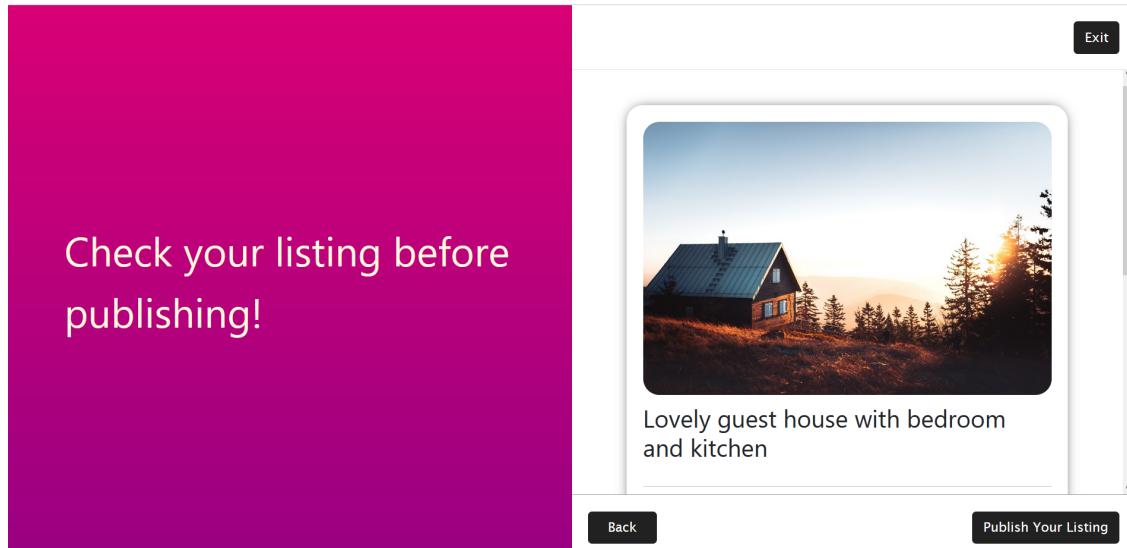

Maximum number of days before arrival to cancel reservation with 50% refund

The left side of the screen is covered by a large red rectangular overlay. On the right, there is a white input field with a thin black border. At the top right of the input field is a small black rectangular button labeled "Exit". Inside the input field, the price "\$25" is centered in a large, bold, black font. To the left of the price is a small circle with a minus sign (-) and to the right is a small circle with a plus sign (+). Below the price, the text "per night" is written in a smaller, gray font. Underneath the input field, there are two checkboxes. The first checkbox is empty and followed by the text "Partial pay allowed". The second checkbox has a blue checkmark and is followed by the text "Host permission required". Below these checkboxes is a section titled "Cancellation policy:" in a small, bold, black font. This section contains a text input field with the placeholder "Maximum number of days before arrival to cancel reservation with 50% refund". To the right of this input field is a small number "3" with a minus sign (-) to its left and a plus sign (+) to its right. At the very bottom of the screen, there are two dark gray rectangular buttons labeled "Back" and "Next".
